BRAND-NEW AND SUCCESSFUL: SP WINTER SPORT 3D.

Various test results confirm that you can rely on the Dunlop SP Winter Sport 3D at any time in winter. With its clever arrangement of 3 different kinds of sipes the Dunlop SP Winter Sport 3D masters all facets of winter and ensures excellent grip on snow, ice and slush. The revolutionary new 3D interlocking sipe opens up to grip the snow on wintery roads, then locks tight if the road becomes dry or greater stability at high speeds. This is cutting edge tyre technology that allows drivers to get the best out of their cars in winter, no matter what the conditions are.

The Dunlop SP Winter Sport 3D offers a large variety of dimensions ranging from 15 to 19" (series 65 to 30) and is also available with speed index "W" (270 km/h).

"Well balanced allround winter tyre with fantastic driving properties on icy roads. Excellent, harmonic handling in the wet."

"Well balanced tyre with best results in the wet, extraordinary results on dry roads."

SP Winter Sport 3D,
205/55 R 16 H

"The new Dunlop tyre shows the highest traction force on snow and superior driving properties. Good stopping power. Well balanced in the wet with excellent cornering and good aquaplaning resistance. Good driving comfort and low rolling resistance."

"Well balanced allround winter tyre with fantastic driving properties on icy roads. Excellent, harmonic handling in the wet."

PROVEN AND TESTED: DUNLOP SP WINTER SPORT M3.

As a comfortable High Performance winter tyre the SP Winter Sport M3 gives you the safety you need and the grip you expect. The optimised sipe structure in combination with a directional tread pattern and a new silica compound ensure more traction, high aquaplaning resistance and excellent grip on dry and wet surfaces.

"Best in the wet, very good on dry roads."

"The comfortable and quiet SP Winter Sport M3 still represents a top allround winter tyre offering excellent snow traction, harmonic handling and well balanced on wet and dry tracks."

"Excellent in the wet and on snow."

"Best tyre in the wet."

"Short braking distances and good cornering on snow, balanced and dynamic driving properties on dry roads."
